Dear Brian and Phil:

Well...according to Rachael Gordon of the Chronicle the three of us (by inference) absolutely ruined the sewer system in San Francisco by preventing PUC from increasing rates because we placed a rate freeze measure on the ballot a few years back etc. etc. (a false statement...as they could have raised rates at any time) However, you should be ashamed of yourselves.

Should we now help to raise a billion for rebuilding the sewers and another billion for the Southeast digesters plant (neither of which has a long term strategic plan), cross city sewers (opposed by a great majority of San Franciscans) or Hunters Point Sewer system (after the polluted land and waters are cleaned up)? Should we ignore the fact that PUC continues to waste multi-millions with questionable and manipulative transfer of funds to DPW and highly questionable friendly consultants from bond funds & private loans not approved by the citizens nor even known by the citizenry to

exist, private loans that are added onto the bond debt while ignoring the 13 billion dollar debt that the City has for PUC, DPW, Ports, SFO and a few other projects?

Should we ignore the manipulation and scare tactics about what an earthquake could do to our water system and the dastardly negative impact of the coming drought as articulated during the last boondoggle bond issue knowing that there still exist a lack of a long term strategic plan at PUC managed by an overpaid group of resume misfits?

I don't think we should ignore this poorly researched article and the manipulative intent behind it!

When will the media tell the citizens the truth?

**Richard Bodisco**
